

Meeting growers' needs: Exchanging Technologies on Irrigation and Fertigation

15-16 November 2017
World Horti center, The Netherlands

FERTINNOWA is organising a workshop on technologies for the: water and nutrient use efficiency improvement, preparation of irrigation water, and reduction of emissions with impact on the environment. One-of-a-kind event as growers, advisors, industry, policymakers, local authorities and researchers will have the opportunity to interact directly together.

15 November 2017

- 12:45 – 13:15 *Registration and welcome drink*
- 13:15 – 13:30 *Welcome and introduction*
- 13:30 – 14:00 *Outcomes of FERTINNOWA: Irrigation and fertigation practices and technologies all over Europe. How can we learn from each other?*
- 14:00 – 15:00 *Interactive technology tour 1 or Policy working session*
- 15:00 – 15:30 *Refreshment break at the technology market*
- 15:30 – 16:30 *Interactive technology tour 2 or Policy working session*
- 16:30 – 16:50 *Closing session with Innovation award ceremony*
- 16:50 – 18:30 *Networking drink at the technology market*

16 November 2017

8:00-13:30 *Field visits*

Van der Lans: One of the biggest tomato growers. At the farm, you will find out more about the use of geothermics and their water and nutrient management practices.

Ter Laak Orchids: You will have a look at one of the most automatised production systems in horticulture

Cost: Workshop free of charge, field visits €20
